

Overview of Prevent-Teach-Reinforce for Young Children

Overview of Prevent-Teach-Reinforce for Young Children

Pyramid Model
Preschool Training Series

National Center for
Pyramid Model
INNOVATIONS
ChallengingBehavior.org

1

Agenda

- Learn the steps of the PTR-YC process for developing an individualized behavior support plan
- Understand PTR-YC through a case study

2

Expectations for Learning Together

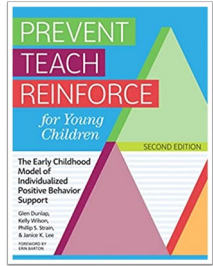

- We are safe and healthy
 - Take breaks as needed
 - Move if you need to
 - Stand up for micro-breaks
- We are respectful
 - Listen to understand
 - Value everyone's ideas
- We are friendly and kind
 - Step up/step back
 - Be kind

3

PTR-YC: A Manualized Process for Behavior Support

- A model specifically designed for preschool settings for individualized intervention with challenging behavior
- Research-based practices
- Detailed steps for designing and implementing positive interventions

Summary of the steps:
https://challengingbehavior.cbcs.usf.edu/docs/PTRYC_process-forms.pdf

4

Using PTR-YC

- Implemented by a collaborative team
 - Teacher, family member, other team members who know the child, classroom coach
- Facilitated by a person trained in individualized behavior support
 - Skills in functional behavioral assessment, behavior intervention plan development, and collaborative teaming

5

Families as a Partners

How to Include Families at Every Step of the PTR-YC Process

Step 1

- Identify the family member who will be the primary contact for the PTR-YC process.
- Contact the family member to discuss the PTR-YC process and the importance of family involvement.
- Establish a regular communication plan with the family member.

Step 2

- Identify the family member who will be the primary contact for the PTR-YC process.
- Contact the family member to discuss the PTR-YC process and the importance of family involvement.
- Establish a regular communication plan with the family member.

Step 3

- Identify the family member who will be the primary contact for the PTR-YC process.
- Contact the family member to discuss the PTR-YC process and the importance of family involvement.
- Establish a regular communication plan with the family member.

Step 4

- Identify the family member who will be the primary contact for the PTR-YC process.
- Contact the family member to discuss the PTR-YC process and the importance of family involvement.
- Establish a regular communication plan with the family member.

Step 5

- Identify the family member who will be the primary contact for the PTR-YC process.
- Contact the family member to discuss the PTR-YC process and the importance of family involvement.
- Establish a regular communication plan with the family member.

What to Expect from the Prevent-Teach-Reinforce for Young Children (PTR-YC) Process

As you have seen, the PTR-YC process is a manualized process designed to help preschool teachers and other professionals develop and implement individualized behavior support plans for young children with challenging behaviors. The PTR-YC process is a collaborative effort between the preschool teacher and the family member. The PTR-YC process is a manualized process designed to help preschool teachers and other professionals develop and implement individualized behavior support plans for young children with challenging behaviors. The PTR-YC process is a collaborative effort between the preschool teacher and the family member.

Why would your child benefit from PTR-YC?

The PTR-YC process is a manualized process designed to help preschool teachers and other professionals develop and implement individualized behavior support plans for young children with challenging behaviors. The PTR-YC process is a collaborative effort between the preschool teacher and the family member. The PTR-YC process is a manualized process designed to help preschool teachers and other professionals develop and implement individualized behavior support plans for young children with challenging behaviors. The PTR-YC process is a collaborative effort between the preschool teacher and the family member.

What is PTR-YC?

PTR-YC is a manualized process designed to help preschool teachers and other professionals develop and implement individualized behavior support plans for young children with challenging behaviors. The PTR-YC process is a collaborative effort between the preschool teacher and the family member. The PTR-YC process is a manualized process designed to help preschool teachers and other professionals develop and implement individualized behavior support plans for young children with challenging behaviors. The PTR-YC process is a collaborative effort between the preschool teacher and the family member.

6

PTR-YC Pathway

The child is engaging in persistent, challenging behavior...

Team Meeting #1:

- Discuss current behavior
- Set goals
- Set up data collection

Team Meeting #2:

- Complete functional assessment forms
- Confirm hypothesis

Team Meeting #3:

- Discuss behavior support strategies and design plan

Evaluate progress and adjust accordingly

Jackson

- 4 years of age
- Non-profit child care center
- 12 children
- 2 Adults: Teacher and co-teacher
- Lives with mother, visits with father
 - Family on waiting list to receive in home behavioral therapy
 - Receives OT at home

7

8

Meet Jackson

Jackson's Team

- Jackson's mother
- Teacher
- Co-teacher
- Two members of the school's administrative staff who focus on inclusion and challenging behavior
- PTR-YC Facilitator

9

10

Goal Setting

- Identify the child's challenging behaviors to decrease
- Select one challenging behavior to target
- Operationally define this target behavior
- Identify the child's desirable behaviors to increase
- Select one desirable behavior to increase
- Operationally define this target behavior

PTR-YC Goal Sheet

PTR-YC Goal Sheet	
1. Identify the child's challenging behaviors to decrease. 2. Select ONE challenging behavior to target. 3. Operationally define this target behavior—observable (seen or heard) and measurable (counted or timed). 4. Identify the child's desirable behaviors to increase. 5. Select ONE desirable behavior to increase. 6. Operationally define this target behavior—observable (seen or heard) and measurable (counted or timed).	
Child:	Date:
1. Behaviors to decrease	
2. Target behavior	
3. Operational definition	
4. Behaviors to increase	
5. Target behavior	
6. Operational definition	

11

12

Reflection: Jackson

- Reflect on Jackson and what you observed.
- What might be goals for Jackson?
 - Challenging behavior to decrease?
 - Behavior to increase?

Jackson's Goals

Behavior(s) to Decrease	"Attention seeking" "trying to get a reaction" aggression, getting into peers' spaces, not accepting play that is not on his terms, not engaging, not asking for help
Target Behavior	Aggression
Operational Definition	Pushing, hitting, throwing toys/objects, grabbing, blocking, forcing his body into the space of peers (looks like hugging, but is forceful with squeezing)
Behavior(s) to Increase	Peer-related social skills, "play successfully," maintain play with peers
Target Behavior	Peer-related social skills
Operational Definition	Getting a peer's attention (tap, look, say name) and/or sharing (say "here" while handing an object)

13

14

Behavior Rating Scale (BRS)

- Target behaviors (desirable and challenging behavior)—defined on goal sheet
- Determine the dimension (e.g., frequency, duration, % of opportunities) of the behavior that will be measured
- Determine when the behavior should be observed
- Develop anchors for the rating scale

Anchor Examples

Behavior	Rating Scale
Follows the Daily Schedule	5 = Teacher points to activity/area 4 = Teacher provides initial physical prompt 3 = Teacher provides physical prompt part of the way 2 = Teacher provides physical prompt most of the way 1 = Teacher physically guides to activity/area
Physical aggression toward self/others	5 = 8 or more times per day 4 = 6 or 7 times per day 3 = 4 or 5 times per day 2 = 2 or 3 times per day 1 = 0 or 1 time per day

15

16

PTR-YC Behavior Rating Scale

Child	Start	End	Rate	Site and Location	Observation period	All Day	Morning	Afternoon
Desirable behavior								
Requests with pictures/gestures	5	5	5	5	5	5	5	5
	4	4	4	4	4	4	4	4
	3	3	3	3	3	3	3	3
	2	2	2	2	2	2	2	2
	1	1	1	1	1	1	1	1
Challenging behavior								
Physical aggression to self or others	5	5	5	5	5	5	5	5
	4	4	4	4	4	4	4	4
	3	3	3	3	3	3	3	3
	2	2	2	2	2	2	2	2
	1	1	1	1	1	1	1	1

Desirable behavior: Requests with pictures/gestures	Challenging behavior: Physical aggression to self or others
5 = Verbal reminder to use pictures	5 = 8 or more times per day
4 = Gestural prompt to use pictures	4 = 6 or 7 times per day
3 = Initial physical guidance to use pictures	3 = 4 or 5 times per day
2 = Partial physical guidance to use pictures	2 = 2 or 3 times per day
1 = Hand over hand guidance to use pictures	1 = 0 or 1 time per day

Jackson's Anchors

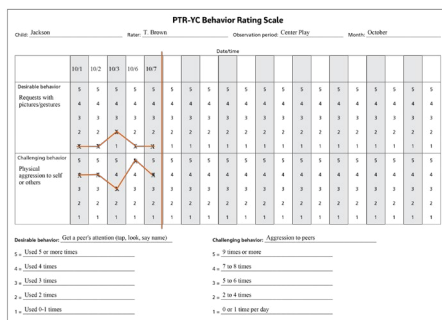

- Dimension: Frequency for both
- Peer-related social skills* (independently used):
 - 1 = Skill used 0-1 time
 - 2 = Skill used 2 times
 - 3 = Skill used 3 times
 - 4 = Skill used 4 times
 - 5 = Skill used 5 or more times
- Aggression*:
 - 1 = 1 to 2 times
 - 2 = 3 to 4 times
 - 3 = 5 to 6 times
 - 4 = 7 to 8 times
 - 5 = 9 times or more

*see operational definitions

17

18

PTR-YC Behavior Rating Scale: Jackson Week 1

Functional Behavioral Assessment

- PTR-YC process:
- Three checklists:
 - **Prevent** to examine factors relating to antecedents and environmental influences,
 - **Teach** to identify behavior functions, and
 - **Reinforce** to identify maintaining consequences for challenging and appropriate behavior

PTR-YC Functional Behavioral Assessment Checklist: Prevent

Child: Jackson Name: T. Brown Observation period: Center Play Months: October

1. Are there any antecedents that may be contributing to the behavior? (Check all that apply)

2. Are there any environmental factors that may be contributing to the behavior? (Check all that apply)

3. Are there any social factors that may be contributing to the behavior? (Check all that apply)

4. Are there any physical factors that may be contributing to the behavior? (Check all that apply)

5. Are there any other factors that may be contributing to the behavior? (Check all that apply)

19

20

Summary & Hypothesis

- Identify the major patterns or themes of the information collected from the team
- Hypothesis statements are the culmination of the individualized Functional Behavior Assessment (FBA)
- The hypothesis leads directly to the development of the behavior intervention plan

When (something in the environment occurs), then (description of the behavior); as a result, (the typical consequence that reinforces the behavior).

PTR-YC Assessment Summary Table

Child: Jackson Name: T. Brown Observation period: Center Play Months: October

Desirable behavior: Check a peer's situation (top, back, any name):
 1 = Used 5 or more times
 4 = Used 4 times
 3 = Used 3 times
 2 = Used 2 times
 1 = Used 1-1 times

Challenging behavior: Aggression to peers:
 5 = 5 times or more
 4 = 4 times
 3 = 3 times
 2 = 2 times
 1 = 1 time per day

21

Jackson: Hypothesis Statement

When Jackson **is in non-structured social play** (center time/outside play), **he will engage in physical aggression** (see operational definition); as a result, **he will gain attention from adults/peers and/or receive object from peers** and/or **escape from the activity** (by being sent to a quiet space).

22

PTR-YC Menu of Intervention Strategies

Prevent Strategies	Teach Strategies	Reinforce Strategies
Provide choices	Teach communication skills (FCT).	1. Identify a functional reinforcer(s).
Intersperse difficult or nonpreferred tasks with easy or preferred tasks.	Embed multiple instructional opportunities.	2. Provide reinforcer for desirable behavior.
Use visual supports and schedules.	Teach peer-related social skills.	3. Avoid reinforcing challenging behavior.
Embed preferences into activities.	Teach self-monitoring.	
Enhance predictability with schedules.	Teach child to tolerate delay of reinforcement.	
Alter the physical arrangement of the classroom.	Teach independence with visual schedules.	
Remove triggers for challenging behaviors.		

23

Reflection

- What strategies might the team consider to **prevent** Jackson's challenging behavior?
- What new skills might be the focus to **teach**? Remember the skill must help the child access the reinforcer they are seeking (e.g., **obtain peer attention**).
- We saw that the challenging behavior was being maintained by **attention and escape**, what **reinforce** strategies might the team consider using?

24

Jackson's Plan

Prevent	Teach	Reinforce
Provide choices (explicit choices in activities and play)	Buddy play system — peers assigned to play group for 3 center rotations	Frequent use of positive descriptive feedback for appropriate behavior and use of social skills
Alter arrangement of classroom (limit items in centers to promote social skills opportunities)	Embedded skill instruction and practice for social interaction skills	<i>When challenging behavior occurs:</i> Intervene with limited language and attention and redirect to another activity; when calm return to center for play and reinforce appropriate behavior

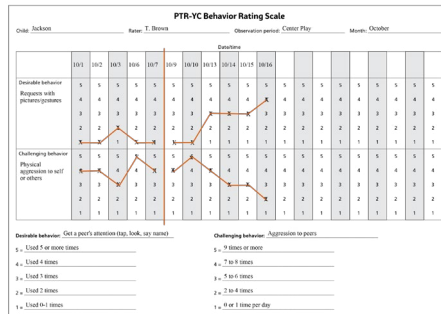

Jackson with a Plan

25

26

PTR-YC Behavior Rating Scale: With Plan

27

Summary

- PTR-YC is a team process for identifying goals, conducting a functional assessment, and developing a behavior support plan
- You are a key member of the team!
 - Initiate the process
 - Provide observations
 - Collect data
 - Develop the plan
 - Implement the plan with fidelity
 - Monitor child progress

28
