

Teacher's Guide: Positive Interactions with Siblings and Friends

What is This?

This resource will guide families in creating opportunities to promote their infant/toddler's peer interactions during natural routines at home.

How Do I Use This?

1. Review the resource:

Read the handout and understand the topic.

2. Help families reflect and try:

Share the handout with families (via newsletter, daily note, email, text, or an app for virtual communications). Encourage families to reflect on how they promote sibling and peer interactions in their home.

3. Engage:

Using the poll (attached to this resource), create and post a large visual (e.g., bar graph on a chart paper; using dot markers or stickers to indicate practices) at the entrance of your classroom. Encourage families to participate in the poll during drop-off/pick-up. As families participate in the poll, ask them how their children interact with siblings and friends outside the class and share how you promote peer interactions in classroom. Or use email, text, or a communication app for virtual communications.

4. Reflect:

Based on the poll results, reflect on the level of peer interactions in the class and reflect on which child would benefit from more supports for peer interactions.

5. Adjust:

Based on families' answers to the 4th box on the poll, try embedding the family-suggested play activities in the classroom.

Daim ntawv qhia rau tsev neeg: Kev sib tham zoo nrog Cov nus muag thiab cov phooj ywg

Kev sib tham nrog lwm tus yog ib feem loj ntawm qhov kev loj hlob saum lub hlwb rau cov menyuam yaus.
